

# PFREUNDT WK 50

The electronic weighing system for all vehicle types

Let PFREUNDT turn your loader, truck, excavator or conveyor belt into a reliable and accurate system scale. The proven and user-friendly WK 50 electronic weighing system is at the core of PFREUNDT systems.

**Maximum material flow transparency – for all applications!**

- For nearly all applications
- Compact and robust
- Operator-friendly
- Accurate and reliable
- Data accessible worldwide

**Brief overview**

Display example, wheel loader

## Characteristics

- Program-controlled function keys and smooth alphanumeric Keypad
- Night design display with illuminated LED short stroke keys for optimal convenience of operation night or day
- Interfaces for printer (RS232), CAN bus, Multi-I/O, and for wireless data transmission via WLAN, GPRS
- Master data and user administration
- Link to the PFREUNDT Web Portal

# PFREUNDT WK 50

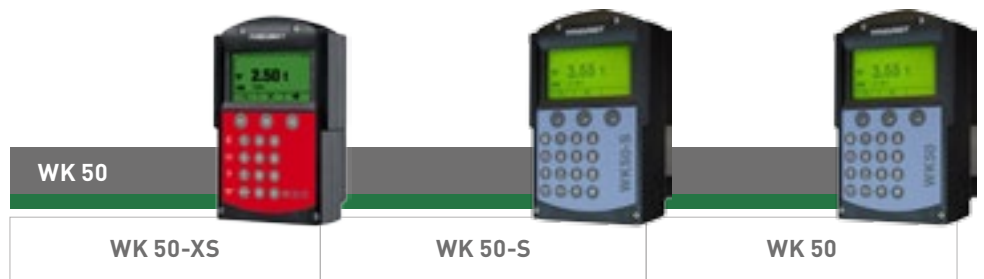

## The electronic weighing system for all vehicle types

The electronic weighing system is available in several versions.

The WK 50 is the flagship in the range. The electronic weighing system is Legal for trade and offers the most comprehensive performance package.

The WK 50-S offers the cheapest entry into Legal for trade weighing.

The WK 50 XS is an electronic weighing system for applications not requiring calibration.
